Volume 24 Number 1 1997

Special Edition: The Yellowstone Petrified “Forests”

by Harold G. Coffin

CONTENTS

Foreword	4
I. Introduction	5
II. General Description	5
A. Stratigraphy	6
B. Successive Layers	7
III. Description of the Petrified Trees	9
A. Taxonomy	12
B. Orientation of Logs and Stumps	13
C. Dendrochronology	13
IV. Description of the “Soil” Levels	16
A. Thickness of Organic Levels	16
B. Soil Profiles	17
V. Evidence for Transport of the “Soils”	18
A. Insufficient Organic Matter	18
B. Organic and Inorganic Sorting	18
C. Atypical Soil Profiles	19
D. Complex Organic Levels	22
E. Palynology	22
F. Lack of Evidence for Weathering	23
G. Absence of Animal Fossils	25
H. Trace Element Profiles	25
I. Examples of Organic Levels from Elsewhere	26
VI. Evidence for Transport of the Petrified Trees	26
A. The Roots	26
B. Lack of Decay	27

C. Orientation of Stumps and Logs	27
D. Abnormal Ecology	28
E. Dendrochronology	29
F. Absence of Bark and Limbs	29
VII. A Modern Case History	30
A. The Eruption of Mount St. Helens	30
B. River Transport of Upright Stumps	31
C. Spirit Lake	31
D. Research in Spirit Lake	32
E. Flotation Characteristics	35
VIII. Allochthonous Model	37
A. Allochthonous Organic Levels	37
B. Allochthonous Trees	37
IX. Conclusion	38
Acknowledgments	38
Glossary	39
Endnotes	40

Cover Pictures

Front Cover: Specimen Creek Ridge, where over twenty levels of fossil trees can be readily seen. **Back Cover:** Small fossil tree (28 cm diameter) extending through two volcanic ash levels. Photographs by Clyde L. Webster.
